PROFILE

Passionate and dedicated recent graduate seeking an entry-level MERN Stack Developer position to leverage my strong foundation in web development, programming skills, and hands-on experience with building responsive and userfriendly applications. I, am properly working on MERN stack. and build some projects like, ECommerce-App, Social-Media-App and Food-Delivery App and etc..

WORK EXPERIENCE

As a Full-Stack-Developer Intern
Dhibar Infotech   2023-2024
- Made a Learning Platform...(LMS)

SELF EXPERIENCE

PROJECTS   2021-Present

- 1. Ecommerce-App: its properly a shopping app. I, am creating the hole project , frontend to backend and also the database, I, am using MERN: mongodb, express, react, node, redux ,material-ui and etc, here login authentication , admin-panel and user can put the review in a product and add-to-cart and order the product and payment process also done here and etc.. LINK:https://64dab98ca8668a0077f2a5ef--lustrous-queijadas71f3bf.netlify.app/

- 2. Social-media-app: here also i am using mern and the features are user can login, then upload his photos and blog . change his own profile, follow & unfollow other people and search your friend and comment on your friend photo and also delete your account . its not deploy yet.,

- 3. Course-Bundler: its like a udemy or byjus type. where you can learn any type of, course if you enrolled already and lots of think i made include admin panel. and also you can add to playlist in your profile. LINK:https://my-bcuv20qos-sushantabhowmick.vercel.app/

- 4. Made a Whatsapp Clone using- MERN with socket.io and google-authenticaton

- Now i am working on a Advanced MultiVendor-Ecommerce webApp
